We are hiring

## DevOps Expert (m/f/d) – 4-6 years

### Job Description:

- Develops and maintains critical information extraction, analysis, and management systems
- Experience in Configuration Management.
- Continuous Integration setup and administration
- Participates in architecture and software development activities.
- Release Engineering: deployment pipelines; continuous deployment
- Open-source Monitoring experience
- Uses coding languages or scripting methodologies to solve a problem with a custom workflow
- Collaborates with others on the project to brainstorm about the best way to tackle a complex technological infrastructure, security, or development problem
- Performs incremental testing actions on code, processes, and deployments to identify ways to streamline execution and minimize errors encountered
- Experience with infrastructure scripting solutions such as PowerShell
- Experience with or knowledge of Agile Software Development methodologies
- Knowledge on Microsoft Dynamics 365 will be an advantage

### Your Qualifications:

- Graduate in Computer Science, IT, IS, or equivalent area of technical study (IT experience can substitute for a BS degree).
- Certified DevOps Engineer
- Excellent oral and written communication skills
